SUBJECT INDEX

Absolute isotope abundance
The gravimetric preparation of synthetic mixtures of iron isotopes 91
Activated complex
Effect of the transmission–reflection properties of the barrier for the activated complex on the rate of charge transfer in gaseous ion/molecule reactions 165
Air
A new method of separation of multi-atomic ions by mobility at atmospheric pressure using a high-frequency amplitude-asymmetric strong electric field 143
Ammonium salts
Cluster ion formation in thermospray mass spectrometry of ammonium salts 123
Atomic weight
The gravimetric preparation of synthetic mixtures of iron isotopes 91
Autoionising states
Observation and lifetime of autoionising states of Ar produced in a glow discharge ion source 99

Barrier
Effect of the transmission–reflection properties of the barrier for the activated complex on the rate of charge transfer in gaseous ion/molecule reactions 165
Borinium ion
The heat of formation of $(CH_3O)_2B^+$ L1
Boron
The heat of formation of $(CH_3O)_2B^+$ L1

$C_3H_6N^+$
Isomers of $C_3H_6N^+$ and the interstellar synthesis of C_2H_5CN 83
Charge transfer
Effect of the transmission–reflection properties of the barrier for the activated complex on the rate of charge transfer in gaseous ion/molecule reactions 165
Cluster ions
Cluster ion formation in thermospray mass spectrometry of ammonium salts 123
Coincidence counting
Surface structure investigations using plasma desorption mass spectrometry and coincidence counting 133
Collision induced dissociation
A comprehensive study of the low energy collision-induced dissociation of dinucleotide monophosphates 61

Dinucleotides
A comprehensive study of the low energy collision-induced dissociation of dinucleotide monophosphates 61
Dioxane
The fragmentation pattern of 1,4-dioxane ion 21

Effusion molecular beam
Influence of the inhomogeneity of an electron beam on the stability of the ion current in an ion source with an effusion molecular beam 157
Electron beam
Influence of the inhomogeneity of an electron beam on the stability of the ion current in an ion source with an effusion molecular beam 157
Electron collision cross sections
Absolute cross sections for the dissociative electron impact ionization of the CF_x ($x = 1$–3) free radicals 181
Electron impact ionization
Absolute cross sections for the dissociative electron impact ionization of the CF_x ($x = 1$–3) free radicals 181
Energy spectra
Mathematical modelling of secondary ion energy spectra 173

Field ionization
Primary ion production from various gases in spontaneous desorption 107
Fourier transform ion cyclotron resonance
Fourier transform mass spectrometric studies of isovalent rare earth ions Sc^+, Y^+ and Lu^+ with methanol. Formation of dimethoxide–metal species $M(OCH_3)_2^+$ 1
Masses of stable neon isotopes determined at parts per billion precision by Fourier transform ion cyclotron resonance mass spectrometry 47
Fourier transform mass spectrometry
Masses of stable neon isotopes determined at parts per billion precision by Fourier transform ion cyclotron resonance mass spectrometry 47

Free radicals
Absolute cross sections for the dissociative electron impact ionization of CF_x ($x = 1$–3) free radicals 181

Gas phase
Fourier transform mass spectrometric studies of isovalent rare earth ions Sc^+, Y^+ and Lu^+ with methanol. Formation of dimethoxide–metal species $M(OCH_3)_2^+$ 1

Glow discharge
Observation and lifetime of autoionising states of Ar produced in a glow discharge ion source 99

Highly charged ions
Recoil ion mass spectrometry. Part 2. Formation of slow multiply charged recoil ions in collisions of fast negative ions with Ar and Kr atoms 195

Interstellar
Isomers of $C_3H_6N^+$ and the interstellar synthesis of C_2H_5CN 83

Ion cyclotron resonance
Masses of stable neon isotopes determined at parts per billion precision by Fourier transform ion cyclotron resonance mass spectrometry 47
The fragmentation pattern of 1,4-dioxane ion 21

Ion source
Influence of the inhomogeneity of an electron beam on the stability of the ion current in an ion source with an effusion molecular beam 157

Ion/molecule reactions
Effect of the transmission–reflection properties of the barrier for the activated complex on the rate of charge transfer in gaseous ion/molecule reactions 165
Isomers of $C_3H_6N^+$ and the interstellar synthesis of C_2H_5CN 83

Iron
The gravimetric preparation of synthetic mixtures of iron isotopes 91

Isomeric ions
The fragmentation pattern of 1,4-dioxane ion 21

Isotope
Positive thermal ionization mass spectrometry of molybdenum 115

Isotopic reference material
The gravimetric preparation of synthetic mixtures of iron isotopes 91

Lifetimes
Observation and lifetime of autoionising states of Ar produced in a glow discharge ion source 99

Mass spectrometry
Positive thermal ionization mass spectrometry of molybdenum 115

Metal alkoxide
Fourier transform mass spectrometric studies of isovalent rare earth ions Sc^+, Y^+ and Lu^+ with methanol. Formation of dimethoxide–metal species $M(OCH_3)_2^+$ 1

Methanol
Fourier transform mass spectrometric studies of isovalent rare earth ions Sc^+, Y^+ and Lu^+ with methanol. Formation of dimethoxide–metal species $M(OCH_3)_2^+$ 1

Misalignment
Parasitic aberrations in static sector field mass analyzers and their correction. Part 1. First order approximation 149

Mobility
A new method of separation of multi-atomic ions by mobility at atmospheric pressure using a high-frequency amplitude-asymmetric strong electric field 143

Modeling
Mathematical modelling of secondary ion energy spectra 173

Molybdenum
Positive thermal ionization mass spectrometry of molybdenum 115

Multi-atomic ions
A new method of separation of multi-atomic ions by mobility at atmospheric pressure using a high-frequency amplitude-asymmetric strong electric field 143

Multiphoton ionization
A novel four grid ion reflector for saturation of laser multiphoton ionization yields in a time of flight mass spectrometer 31

Multipole corrector
Parasitic aberrations in static sector field mass analyzers and their correction. Part 1. First order approximation 149

Negative ion collisions
Recoil ion mass spectrometry. Part 2. Formation of slow multiply charged recoil ions in collisions of fast negative ions with Ar and Kr atoms 195

Negative ions
A comprehensive study of the low energy collision-induced dissociation of dinucleoside monophosphates 61

Nucleotides
A comprehensive study of the low energy collision-induced dissociation of dinucleoside monophosphates 61

Parasitic abberations
Parasitic abberations in static field mass analyzers and

their correction. Part 1. First order approximation 149
Photodissociation
The fragmentation pattern of 1,4-dioxane ion 21
Plasma desorption
Surface structure investigations using plasma desorption mass spectrometry and coincidence counting 133
Plasma processing
Absolute cross sections for the dissociative electron impact ionization of the CF_x $(x = 1–3)$ free radicals 181
Precise mass measurement
Masses of stable neon isotopes determined at parts per billion precision by Fourier transform ion cyclotron resonance mass spectrometry 47
Primary production
Primary ion production from various gases in spontaneous desorption 107
Proton affinity
The heat of formation of $(CH_3O)_2B^+$ L1

Quantification of Ta and Fe
A novel four grid ion reflector for saturation of laser multiphoton ionization yields in a time of flight mass spectrometer 31

Rare earth metal ions
Fourier transform mass spectrometric studies of isovalent rare earth ions Sc^+, Y^+ and Lu^+ with methanol. Formation of dimethoxide–metal species $M(OCH_3)_2^+$ 1
Recoil ion collisions
Recoil ion mass spectrometry. Part 2. Formation of slow multiply charged recoil ions in collisions of fast negative ions with Ar and Kr atoms 195

Saturation effects
A novel four grid ion reflector for saturation of laser multiphoton ionization yields in a time of flight mass spectrometer 31
Secondary ion
Mathematical modelling of secondary ion energy spectra 173
Sector field
Parasitic aberrations in static sector field mass analyzers and their correction. Part 1. First order approximation 149
Selected-ion flow tube
Isomers of $C_3H_6N^+$ and the interstellar synthesis of C_2H_5CN 83
Separation
A new method of separation of multi-atomic ions by mobility at atmospheric pressure using a high-frequency amplitude-asymmetric strong electric field 143
Spontaneous desorption
Primary ion production from various gases in spontaneous desorption 107
Surface ionization
A new method of separation of multi-atomic ions by mobility at atmospheric pressure using a high-frequency amplitude-asymmetric strong electric field 143
Surface structure
Surface structure investigations using plasma desorption mass spectrometry and coincidence counting 133

Tandem mass spectrometry
A comprehensive study of the low energy collision-induced dissociation of dinucleoside monophosphates 61
Thermal ionization
Positive thermal ionization mass spectrometry of molybdenum 115
Thermochemistry
The heat of formation of $(CH_3O)_2B^+$ L1
Thermospray ionization
Cluster ion formation in thermospray mass spectrometry of ammonium salts 123
Time of flight design
A novel four grid ion reflector for saturation of laser multiphoton ionization yields in a time of flight mass spectrometer 31
Trimethyl borate
The heat of formation of $(CH_3O)_2B^+$ L1

Work function
Positive thermal ionization mass spectrometry of molybdenum 115
